

# Membership App

## Overview

This is a digital membership mobile app that will be used to replace the traditional member card in our restaurant. Something like Starbucks App or Body Shop App. Member will be able to register with basic personal data (name, date of birth, gender, mobile number, email, password), then login to see her card with unique number (automatically generated).

## Features

App will have these basic features:

### Before login

- Login form
- Forgot password?
- Registration form (name, date of birth, gender, mobile number, email, password)
  - Need to verify email

### After login

- Card
  - Will display an image of member card with number on it. Number is automatically generated for each member. Number is unique and will be the member no.
  - Display barcode and QR Code for the member number
  - Display "Point Rewards" that the member currently have
- Menu
  - Show the food and beverages info
- Promotion
  - Display current promotion the restaurant have, eg: Buy 1 Get 1 FREE, Anniversary Discount, etc.
- My Account
  - Member will be able to edit the profile, change password, upload profile picture, logout.
- FAQ

- List of frequently asked questions that can be updated from time to time
- Store
  - A page that list down all restaurant brances that we have.
  - Will have google map showing the pins of locations
  - Bottom part will be the list of restaurant addresses and phone numbers
- About Us
  - Just text and a little photo, can be updated anytime
- Contact Us
  - Just text informing how to contact the restaurant. Can be updated anytime.

### **Additional Features**

- Push Notifications
  - Apps must be able to display notifications on anything
  - Restaurant can send announcements, greetings, info on new promotion, etc.
- Point Reward
  - We need a simple interface that can add point reward for each member transaction based on their member card number. No need to connect to our current POS system.

### **Platform**

Android & iOS.
